

**TO USE THIS FACILITY IT IS NECESSARY TO BE REGISTERED FOR  
WORLD WIDE INFORMATION.**

Some users have difficulty finding an Airfield with an ICAO Location indicator sufficiently close to their point of departure or destination. In an attempt to fill in some of the gaps on the map AIS have now included a number of locations (unlicensed airfields, Gliding site and Strips) which can be used as points of departure or destinations for briefing purposes. Please note that it is not intended nor possible to include every site in the UK. The inclusion of these sites does not necessarily mean that NOTAM relating to the physical characteristics of the airfield will be issued however activity such as parachuting, gliding, aerobatics etc may occasionally be notified by NOTAM, pilots should also be aware that the absence of a NOTAM does not mean that activities notified in the UK AIP (or indicated on charts) are not continuing to take place during the published hours, which may be outside the AD operating hours.

Please note that while these locations are available as departure/destination points they cannot be used as en-route points for Narrow Route Brief.

The following may be used by entering the code starting with the letter "X" in the departure/destination box on a briefing request.
