

## British Gliding Association

Flight Manual Revision's and Type Certificate Data Sheets for BGA Approved Types.

Aircraft with SAS do not require flight manuals as the basic limitations are on the SAS certificate.

Please note this list is for information only and may not reflect the current modification status of the aircraft and is based on information received from the aircraft type certificate holders. The BGA cannot take any responsibility for inaccuracies. It is the responsibility of the person using the TCDS to ensure it the correct document for the type of glider being researched.

LBA Type Certificate Data Sheets are reproduced with the permission of the LBA. Reference should be made to the [EU Products List](#) to ensure the correct TCDS is being used.

LBA and other National Airworthiness Authority TCDS are replaced by EASA TCDS as changes are required.

Flight manuals and revisions are available from the aircraft manufactures or agents. TC holder Technical Notes should be checked to ensure there are no further FM revisions

Copies of TCDS and SAS are only available via hyperlinks. Printed copies are not available from BGA.

Flight manuals listed, (except as marked \*\*), have been supplied to CAA-UK. All other types will need 1 master copy supplied to CAA-UK on transition to EASA C of A.
