

The questionnaire asks the following questions:

**1. Which do you think are the most important criteria in selecting a potential option and site?**

We are pushing the green agenda here. The existing facility has already been built. So nuisance, noise, pollution, traffic etc are all important criteria

**2. Which broad option A,B,C, or D do you support?**

All of these option involve spending public money supporting a loss making private business. We argue that this is a misuse of public money. The right answer is 'None. Wasps should finance their own business'

**3. Which long list option should be considered?**

None

**4. What short list option is best?**

We believe the stadium should stay where it is, so 'Adams Park'

**5. Not relevant**

**6. Additional Comments**

Booker GC is pushing three key themes:

- a) This project is a misuse of public money
- b) A stadium built at Booker will cause immense environmental harm
- c) It is wrong to destroy a successful gliding club for dubious public benefit
