

## **Laws and Rules Edition 16**

Since producing Laws and Rules Edition 16, the ANO has introduced changes to the legislation which regulates low flying.

The revised Rule 5 states that a glider shall not fly over a congested area below a height of 1,000 feet above the highest fixed obstacle within 600 metres of the aircraft.

An aircraft flying over a congested area shall not fly below such height as would enable the aircraft to land clear of the congested area in the event of a power unit failure

Except with the written permission of the CAA, an aircraft shall not fly over an organised open air assembly of more than 1,000 persons below the higher of the following:-

- (i) 1,000 feet
- (ii) such height as would enable the aircraft to land clear of the assembly in the event of a power unit failure.

The ANO is the definitive authority.
